

Basic Information

Name : SAWAN NARENDRA DAHARE

Course : PG-DAC,Aug25

Address : At.wadhona kh. Tq.kalamb dist.Yavatmal
,Maharashtra , Yavatmal, MAHARASHTRA

CCPP ID : Not Assigned

Academic Details

Level	Stream	Institute	Board/University	Passing Year	Degree %	Division
BE	Computer Engineering	Jagadambha college of Engineering and technology, Yavatmal	Sant Gadge Baba Amravati University , Amravati , Maharashtra	2025	78.75 %	I
XII	Science	Shri. Chintamani Junior College Kalamb	Maharashtra state board of secondary and higher secondary, Pune	2021	86.33 %	I
X	General	Sudam Vidyalay Jodmoha	Maharashtra state board of secondary and higher secondary	2018	85.4 %	I

Academic Projects

Title : ExpiTrack - Smart Inventory and Expiry Tracking System

Platform : J2EE **Duration** : 3 Months

Description : The Expiry Tracking System is a smart inventory management application that helps individuals, retailers, and small businesses efficiently monitor stock and expiry dates of products. The system tracks expiry automatically, generates alerts, and prevents losses caused by expired goods. Users can add items through barcode scanning or manual entry, check stock in real time, and receive notifications for upcoming expiries or low inventory levels.

Title : AgroShield -Plant disease detection system using image processing

Platform : Python **Duration** : 4 Months

Description : The Plant Disease Detection System uses image processing and machine learning to identify diseases in plant leaves. Users upload an image of a leaf, and the system analyzes it using a CNN (Convolutional Neural Network) model to detect the type of disease and suggest remedies. Built with Python, TensorFlow, and OpenCV, it helps farmers detect diseases early, prevent crop loss, and improve yield through quick, accurate diagnosis.

Title : Blood Bank Management System

Platform : J2EE **Duration** : 3 Months

Description : The Blood Bank Management System is a web-based application developed using Java, Spring Boot, and MySQL that manages and tracks blood donations, donors, requests, and stock levels efficiently. It allows hospitals, donors, and recipients to interact through a secure platform.The system maintains details of donors, blood groups, availability, and requests, automating the manual record-keeping process of traditional blood banks.

Other Information

LinkedIn : <https://www.linkedin.com/in/sawan-dahare-6b1822251/>

Technical Certification : Java, Web Development,

Extra Curricular : 1)Participates in Hackathon
2)Member of ASCI club
3)Participates in cultural activities

Hobbies : 1)Learn newTrendingtechnologies that enhance my knowledge.
Problem Solving.
2)Like to play Cricket and Volleyball.
3)Passionate about fitness and self-discipline through regular gym training.
4)Singing

Personal Information

Date of Birth

:

30/08/2001

Nationality

:

Indian

Languages Known

:

Marathi, Hindi

Gender

:

Male

Foreign Languages

:

English

I hereby declare that the information given above is true to the best of my Information knowledge belief.

Date

:
